Robertito is a 10 year old boy who is characterized by being reserved and creative. He studies and also works, he sells eggs in his neighborhood. His whole family lives very humbly. The parents support their son to help his grandfather, who motivates Robertito to work with honesty and integrity.

The grandfather raises chickens and it is difficult for him to take care of them because one of his legs is giving him issues and makes walking uncomfortable. He decided to propose to his two grandchildren to help him take care of the chickens and the eggs would be their payment "*Only Robertito accepted the deal*" commented his grandfather with a big smile.

“Robertito gets up at 5:00 am without demands or reminder of what he has to do, to change the water for the chickens, feed them and clean the chicken coop,” his mother and grandfather replied.

When he sees the eggs, he collects them and when he has half a dozen, he runs out to offer to his clientele.

Robertito says that he sometimes helps grandfather buy food for the chickens, he has 5 buyers and says he is not embarrassed to do what he does. The money he earns from the sale of eggs he gives to his dad to save, so he can buy something in December.

He was planning to buy a bicycle, but thanks to W/NP, one of his wishes was fulfilled.

His reaction when he realized that the bicycle belonged to him was incredulous, his father encouraged him to ride it, Roberto felt the bicycle was very high. It was funny to hear the boy saying, “Dad, the problem is that I'm a dwarf!”, to which his father replied, “do not worry, the seat is regulated.” He calmed down and looked exited.

I told them for being a very hard-working child, W/NP rewarded him for moving forward, definitely a gift he deserves.

At a young age it is incredible to see children understand the importance of saving money. They are children who are born with a little star next to them. This has a lot to do with how their family guides them.
